## (54) Title: RICE PROMOTERS

(57) Abstract: The present invention provides several promoters isolated from *Oryza sativa*, which promoters are capable of driving and/or regulating the expression of a n operably linked nucleic acid in a plant. The expression pattern s of the promoters according to the present invention have been studied in *Oryza sativa* and some of the promoters displayed specific activity in particular cells, tissues or organs of the plant, while others displayed constitutive expression throughout substantially the whole plant. Some promoters showed weak expression, while others were strongly active.
